

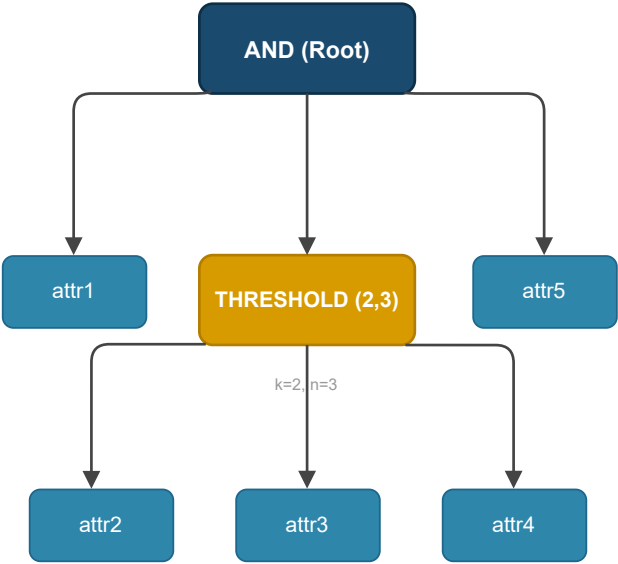

Fig. 3: Threshold Policy Tree and LSSS Matrix Representation

THRESHOLD (2,3): At least 2 out of 3 attributes required
AND: All children must be satisfied

Legend

	Attribute Node		Threshold Gate		Root Node (AND)
---	----------------	---	----------------	---	-----------------

LSSS Matrix $M (\ell \times n)$

	s	v2	v3
attr1	1	0	0
attr2	0	1	0
attr3	0	0	1
attr4	0	-1	-1
attr5	1	0	0

$\lambda_i = M_i \cdot v$ Any k rows can reconstruct s (Lagrange interpolation)
